

Enclosing technology with precision metal solutions since 1940

Hudson Tool & Die, Co. is Now Hudson Technologies
Technically Focused Company Takes on New Name

New Name

Hudson Tool & Die, Co. changed its name to Hudson Technologies in 2007. Hudson Technologies is a JSJ business (www.jsjcorp.com).

“The name Hudson Technologies more accurately depicts the technically-focused and engineering-driven company we have become. Today we are the manufacturing leader in deep-drawn metal stampings. Our passion is working with our customers to create precision metal solutions to enclose their technology,” says President Mark Andrews.

Learn why so many customers are turning to Hudson Technologies.

■ **Cost Effective Solutions**

We offer over 15,000 different shapes and sizes of tooling available with NO TOOLING CHARGE. Prototype quantities to full production are available. Online catalog available at: www.hudson-technologies.com.

■ **Customer-focused, Value-add Capabilities**

We can assist in designing and engineering a precise, close tolerance enclosure to your exacting specifications. Working in collaboration with your requirements, our design, engineering, tooling, supply chain management and production teams offer project management, DFMEA and PFMEA capabilities, inspection and quality programs. We also offer repair and main-

tenance of customer-owned tooling for the life of the project as well as stocking and inventory options.

■ **Technology-driven Performance**

We help drive innovation for our customers. With over six decades of experience in a wide variety of industry applications, we are continually improving our expertise. Examples include our ability to work with a variety of grades and difficult to form metals such as titanium and stainless steel, Finite Element Analysis (FEA) capabilities, and teams focused on quality and Design of Experiments (DOE) to help insure successful results.

■ **Performance Optimization**

The manufacturing team’s goal of exceeding our customers’ expectations in quality and delivery performance is achieved through continuous improvement and the tools of six sigma and lean manufacturing to drive waste from our processes. We are ISO 9001:2001 certified and have over 130 presses ranging from one to 500 tons.

■ **Going Green**

We have fully converted our 115,000 square foot facility to an environmentally sound aqueous, or water-based, cleaning system, completely eliminating chlorinated lubricants and TCE (trichloroethylene) from our manufacturing processes.
