SEAMLESS MEDICAL SOLUTIONS

Deep drawn titanium and stainless steel

Leading U.S. manufacturer of precision engineered critical components for medical devices used in active stimulation and surgical treatment of disease. We have more than 25 years of experience working with many of the leading medical device companies in the industry.

- Proven manufacturing expertise with titanium (Grade 1, 2, 4, 5, 7, 9, 11, 23, 6Al-4V) and stainless steel
- Battery cases
- Capacitor components
- Housing and casing components for cardio, neuro, cochlear and surgical applications
- Shields and half-shells
- Stamped and machined headers

Hudson Technologies is ISO 9001:2000 certified and a green manufacturer. We use environmentally-sound lubricants and an aqueous cleaning system with no hazardous waste. No chlorinated lubricants or solvents are used in our manufacturing process. With over 130 presses ranging from 1 to 500 tons, we have the capacity and flexibility to make deep draw prototypes up to high volume production runs.

- Comprehensive project management with direct access to technical teams
- Design assistance for manufacturability and reliability
- Highly skilled staff of engineers and tool and die makers
- Advanced quality planning and inspection
- In-house heat treatment (vacuum and hydrogen annealing)
- Stocking programs, supply chain management
- Progressive die capabilities
- Finite Element Analysis (FEA)

When your technology depends on a precision metal enclosure, depend on Hudson Technologies

Aerospace • Commercial • Medical • Battery • Transportation • Irrigation • Semi-Conductor
