Hudson Technologies Receives International Environmental Management Certification *- Manufacturer adds ISO 14001:2004 Certification -*

ORMOND BEACH, FL – (Nov. 9, 2011) – Hudson Technologies' environmental management system received ISO14001:2004 certification.

Hudson Technologies quality management system also holds ISO 9001:2008 and 13485:2003 certifications. All three ISO certifications, registered by Orion Registrar, Inc., are effective through October 2014.

The ISO 14001:2004 standard is an internationally recognized framework that requires a company to demonstrate a commitment to compliance with applicable environmental legislation and requirements, and a commitment to continual improvement.

According to the International Organization for Standards, ISO 14001:2004 certification helps assure employees, customers, suppliers, the community and regulatory agencies that the company is an environmentally responsible organization.

President Mark Andrews said, "This certification is the culmination of our efforts to become an environmentally sound company, efforts that began several years ago when we completely eliminated the use of chlorinated lubricants and solvents. We are very proud of the fact that our manufacturing process produces no hazardous waste."

Hudson Technologies manufactures deep drawn, or seamless, metal cases for a variety of industries. Deep drawn cases, also called stampings, are used to enclose technology in components for aerospace, automotive, aviation, commercial battery, implantable medical devices, relay switch cases, capacitors, flow control, irrigation, semi-conductor manufacturing and other applications worldwide. Founded in 1940, Hudson Technologies has over 200 employees and is a business of JSJ Corporation of Grand Haven, MI. Additional information is available at www.hudson-technologies.com and www.jsjcorp.com.
